Work Package 6 Network Facilitation and Communication

All work in WP 6 is according to plan.

Task 6.1 Creation of a Project Website (M1-M6)

The project website for Inno4Grass has been set-up in M1-6 (Deliverable 6.1).

The address of the website is: www.inno4grass.eu.

Responsible for the administration of the contents of the website is task leader Anna Czerwinska at our project partner WIR, Poland. Technical support is provided through the coordinating institution Grünlandzentrum Niedersachsen/Bremen, who also has the overall responsibility. Filling the site with further content will be performed during the complete project term by all partners.

The main page is available in English and the first draft of the website layout was already online in March 2017. Since then it is under constant improvement in accordance with the comments and validation of the project partners.

The website contains so far a project overview with information on the project objectives, the project partners and the work packages including all tasks descriptions. The section news and events is in under development also the link to the information management system (IMS, see also Deliverable D4.1) will be implemented shortly.

In view to provide public project information, the website is translated into all other 6 languages of the Inno4Grass project partners: German, French, Dutch, Swedish, Polish, and Italian. Most of the English content is already available in the other languages.
